Fortified with state-of-the-art German technology, these durable safes ensure greater resistance against force and forgery.

The thicker 6/8mm door and 4/6mm body are constructed using German plasma machine, for laser-precision cut to minimise welding, making it highly resistant to mechanical tools attack.

Stealth Panel with Double Protection

The numeric keypad to unlock the safe is cleverly hidden behind a polished mirror panel, revealed only when a special key is inserted.

#6

Integral Reinforcement

Prying open is virtually impossible with the all-inclusive, thickening hinges installed between the safe's door and body.

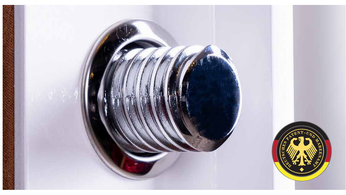
VR Knight & VR Chevalier
Armoured Safe Body (4mm) / Armoured Door Panel (6mm)

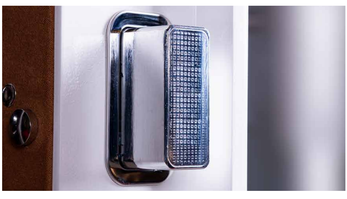
VR Baron & VR Lord
Armoured Safe Body (6mm) / Armoured Door Panel (8mm)

Storm Wind Thread Lock

Our safe is strongly reinforced against pry attacks, with the invincible, German-patented, exclusive whirlwind lock, screwed securely in the screw hole.

• VR Chevalier • VR Baron • VR Lord





Custom-Made Square Bolt

Much more advanced than the traditional cylinder bolt, the square bolt's force surface is greater- effectively improving tamper resistance.

• VR Chevalier (2) • VR Baron (3) • VR Lord (3)

#8

Environmentally Friendly Interior

The safe's interiors are designed with the environmental-friendly camphor wood, covered with flannelette. Fragrant, anti-mold and anti-moth camphor is an ideal material for protecting precious items.
